DOCTOR DISCUSSION GUIDE

I **have** been diagnosed with aortic stenosis.

I am experiencing the following symptoms:

Chest pain or tightness

Swollen ankles or feet

Shortness of breath

Difficulty walking short distances

Lightheadedness or dizziness

Sensations of a rapid fluttering heartbeat

Fainting

I no longer engage in physical activities that I used to enjoy doing six months ago

Heart palpitations

I sleep sitting upright instead of lying flat in bed

Please list any additional symptoms you may be experiencing:

Tell us a little about yourself.

What activities could you do six months ago that you cannot do today?

How were you feeling six months ago?

I was not experiencing any symptoms

I was experiencing some symptoms, and I saw my doctor about it

I was experiencing symptoms, but I did not see a doctor

I was diagnosed with aortic stenosis and my doctor is monitoring my heart

DOCTOR DISCUSSION GUIDE

How consistent are your symptoms?

- I wake up everyday with symptoms
- I experience symptoms a few times a week (usually when I exert energy into certain tasks)
- I experience symptoms everyday, on some days, symptoms are worse
- I do not experience symptoms often

What medications are you currently taking and for what reason?

Questions to ask your doctor:

I am experiencing one or more symptoms of aortic stenosis. What should I do?

If I have severe aortic stenosis, what are my treatment options?

How is aortic stenosis diagnosed?

What types of tests will I need to go through for determining the best treatment option for me?

What types of tests will I need to go through for diagnosis?

Write your own questions to ask your doctor here.
